

## mateco IT – Lead Data Platforms & Master Data

### **We're looking for a Lead Data Platforms & Master Data. Are you the one?**

Are you passionate about data, governance, and complex international IT environments? Do you want to play a key role in shaping our data platform and harmonizing data across a global organization?

Then this opportunity could be the perfect fit for you.

As **Lead Data Platforms & Master Data**, you will take ownership of mateco's data foundations. You will ensure that our master data, data migration initiatives, and analytics platforms remain reliable, scalable, and future-proof. Combining technical expertise with leadership, you will work closely with business stakeholders, ERP teams, and data specialists across the organization.

As Lead Data Platforms & Master Data, you will:

- Define and drive the strategy and governance of master data within an international environment.
- Take ownership of critical data domains, including business partners, equipment, pricing, depots, and financial structures.

- Lead data migration initiatives related to acquisitions, ERP transformations, and system consolidations.
- Establish guidelines for data quality, data ownership, historization, and validation.
- Support and oversee the continued development of our enterprise data platform.
- Ensure the quality of data ingestion from ERP systems, operational applications, and other data sources.
- Collaborate with business stakeholders, PMO, architects, and ERP teams to enable data-driven decision-making.
- Coach and support a team of data engineers, data analysts, and other data professionals.
- Act as the bridge between business, IT, and management for all data-related topics.

## **Ok. And what exactly would make you the perfect fit for this?**

You are a strong fit for this role if you have:

- At least 8 years of experience in data management, data engineering, data governance, or master data management.
- Experience with complex data migration projects in ERP environments or international organizations.
- Strong knowledge of master data management and data governance principles.

- Experience with data warehousing concepts such as Raw, Bronze, Silver, and Gold layers.
- Excellent SQL skills and a solid understanding of ETL/ELT processes.
- Experience with modern data platforms and cloud technologies such as Azure Data Factory, Synapse, Databricks, DBT, or similar solutions.
- Experience leading data teams and mentoring technical specialists.
- Strong stakeholder management skills and the ability to align different interests and priorities.
- An analytical mindset combined with a pragmatic, hands-on approach.

### **Still sounds good? This is what we have to offer you.**

- A key role within an international organization where data is at the heart of the digital transformation journey.
- The opportunity to make a real impact on strategic initiatives involving acquisitions, ERP transformations, and analytics.
- A modern IT environment with cutting-edge technologies and challenging projects.
- A high level of autonomy, responsibility, and room for initiative.
- A culture built on trust, collaboration, and entrepreneurship.
- Flexible working hours and the possibility to work partly from home.
- An attractive salary package complemented by a range of additional benefits.

- A brand-new office in Waregem designed to encourage collaboration and knowledge sharing.

**Alright, convinced you are the one?**
